UpSparks

Wall of Mastery

Flash Card Game

👥 **Multiplayer**

📎 Equipment

- ⭐ <u>UpSparks Flash Cards</u>

📖 How to play

1. Place flash card deck (answers down) between players

2. Each player selects a random card from the deck; the player with the largest correct answer starts

3. In a clockwise direction, players attempt to answer the top card:

   a. If correct, the card is collected and placed in front of the player, forming the first brick of their 'wall of mastery'

   b. If incorrect, the card is placed (answer down) on a new pile called the 'cannonball' pile

4. As more cards are correctly answered and collected, players place their 'bricks' side by side forming their 'wall of mastery'

5. When a card is collected with the same answer as one already in the player's wall, they are given the opportunity to answer a 'cannonball' card (if there are cards in the 'cannonball' pile):

   a. If the 'cannonball' card is answered correctly, the player can knock out a brick from one opponents 'wall of mastery'

   b. If the 'cannonball' card is answered incorrectly, it is placed to the bottom of the 'cannonball' pile

6. Play continues from player to player until all cards in the deck have been answered

🏆 Winner

- The **player with the largest wall** when the game ends is the winner
- Tie-break - highest card wins

Expand the game

➔ Try using dominos and marbles to build and obliterate **real-life** 'walls of mastery'
➔ Take the game **outside** using boxes and balls
➔ Want to include more players? **Combine** two or more <u>flash card decks</u> together
